Problem statement 2

DEEP LEARNING

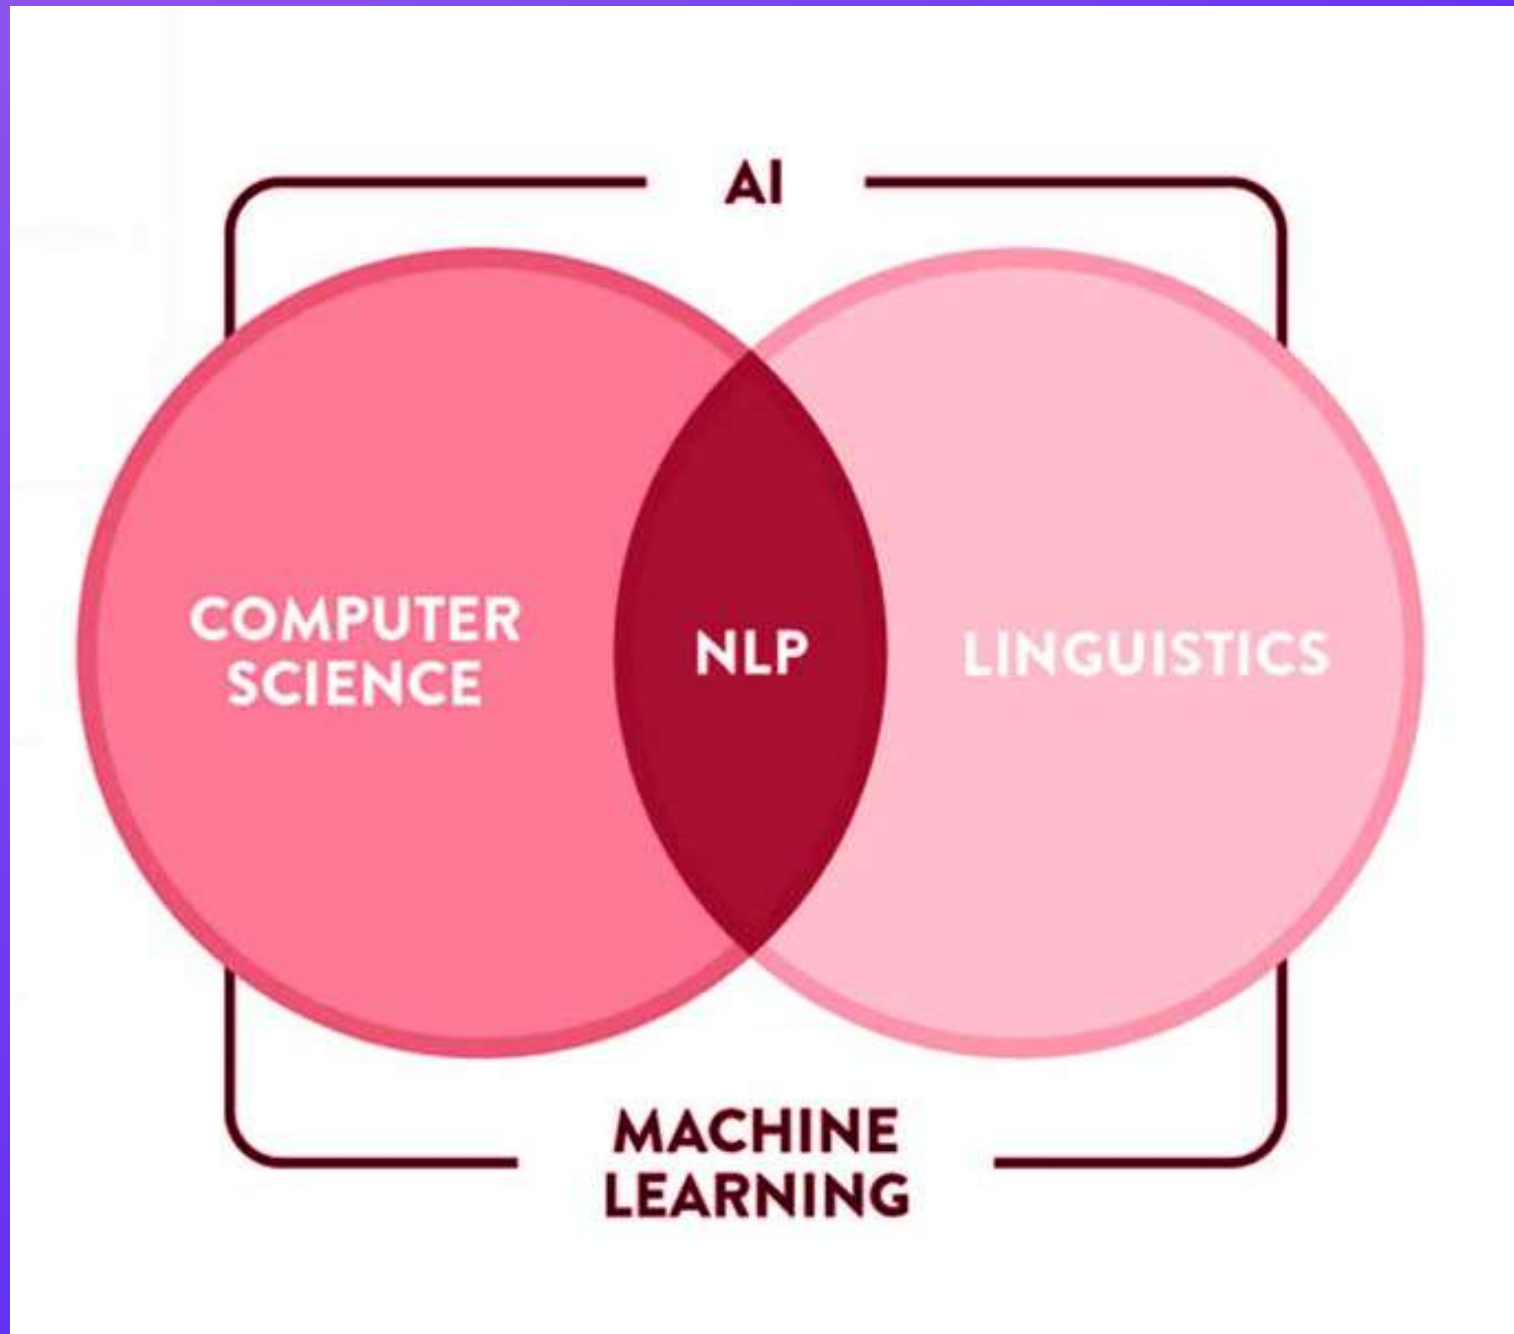

DEEP NEURAL NETWORKS ARCHITECTURE

It is a method in
Artificial Intelligence
(AI) that teaches
computers to process data
in a way that is inspired
by the human brain

NATURAL LANGUAGE PROCESSING (NLP)

It is the ability of a computer program
to understand human language as it is
spoken and written

12 million

adults are misdiagnosed every year

10-20% are patients with **serious conditions**

44% of some **types of cancer** are misdiagnosed

51% of breast imaging second opinions result in a **big change of interpretation**

M²

MediMentor
NLP BASED CHATBOT FOR DOCTORS

ISSUES IN EXISTING CHATBOTS

ISSUE 01

**Data quality and
quantity**

ISSUE 02

Accuracy

ISSUE 03

**Data privacy and
security**

FUNCTIONALITIES

**Differential
disease diagnosis**

**Analysis of
medical images
and electronic
health records**

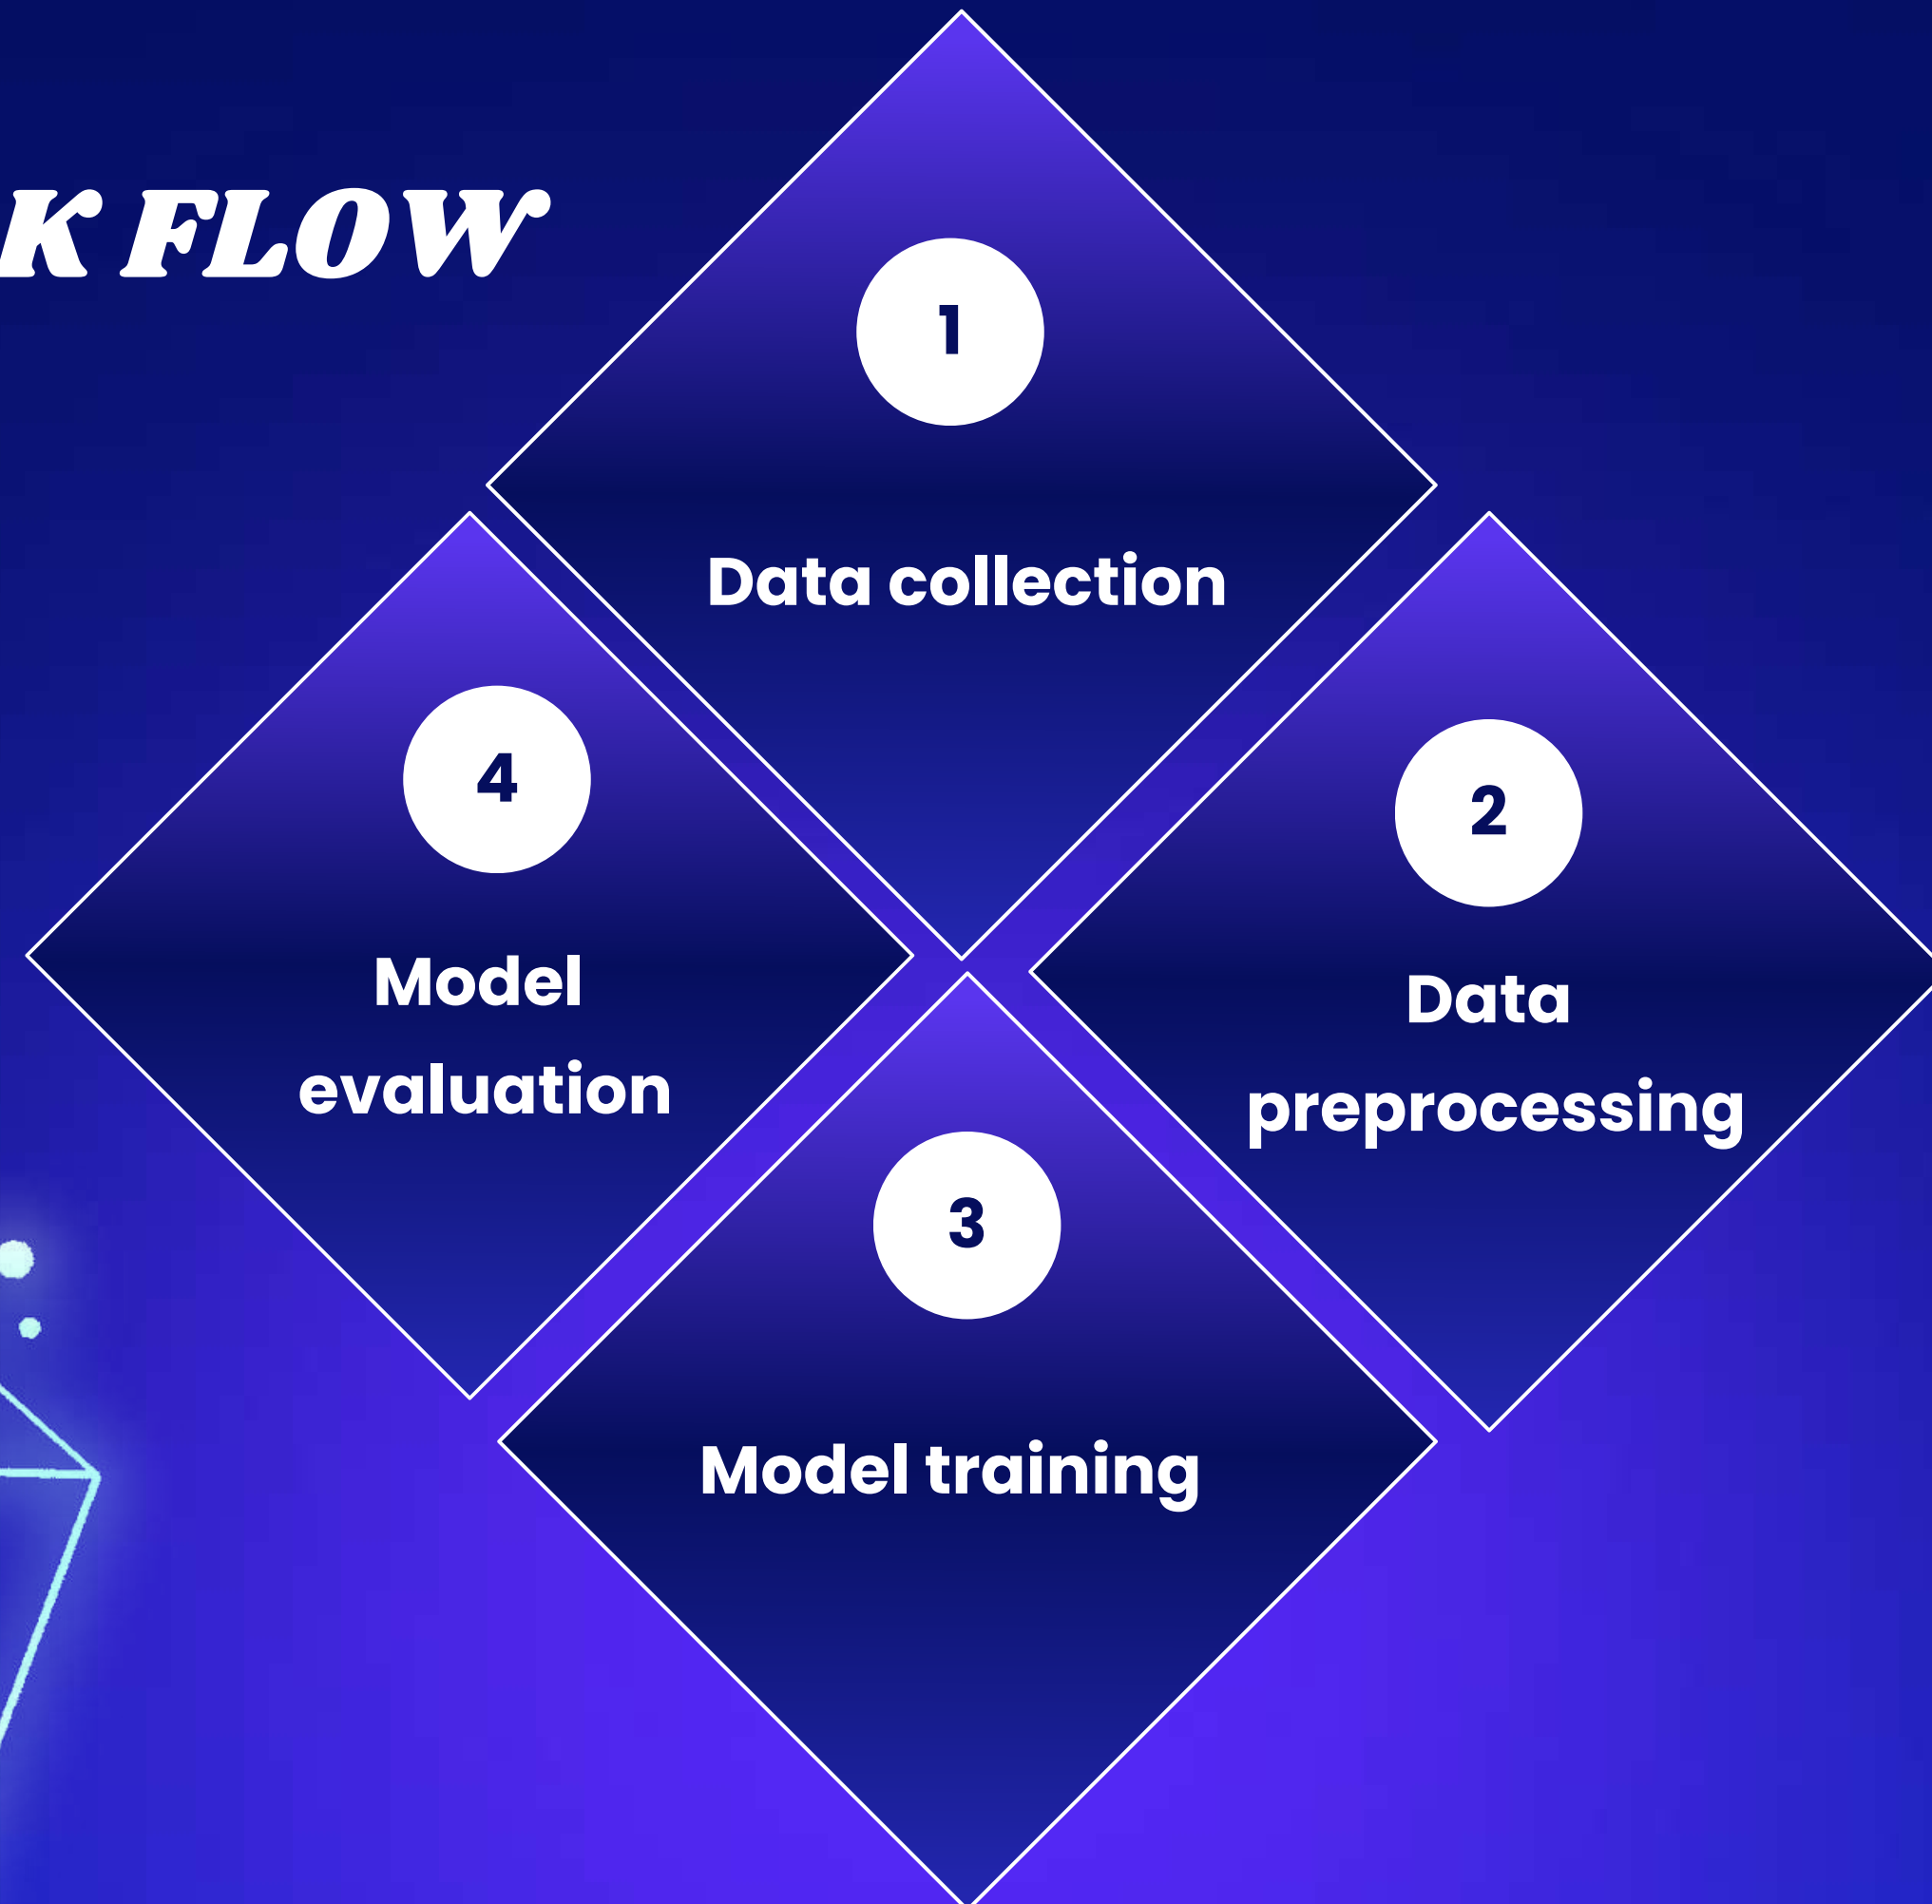

**Precision
medicine**

**Latest
advancements
and technologies
in the field of
medicine**

WORK FLOW

1 ***Data collection***

Structured and Unstructured data

- **Medical records of patients (EHR)**
- **Medical research papers**
- **Medical textbooks and guidelines**
- **Publicly available online resources**

2

Data preprocessing techniques

- **Case normalization**
- **Tokenization**
- **Stop word removal**
- **Intent classification**

2

Data preprocessing techniques

- **Medical terminology normalization**
- **Medical abbreviation expansion**
- **Medical entity recognition**
- **Medical intent classification**

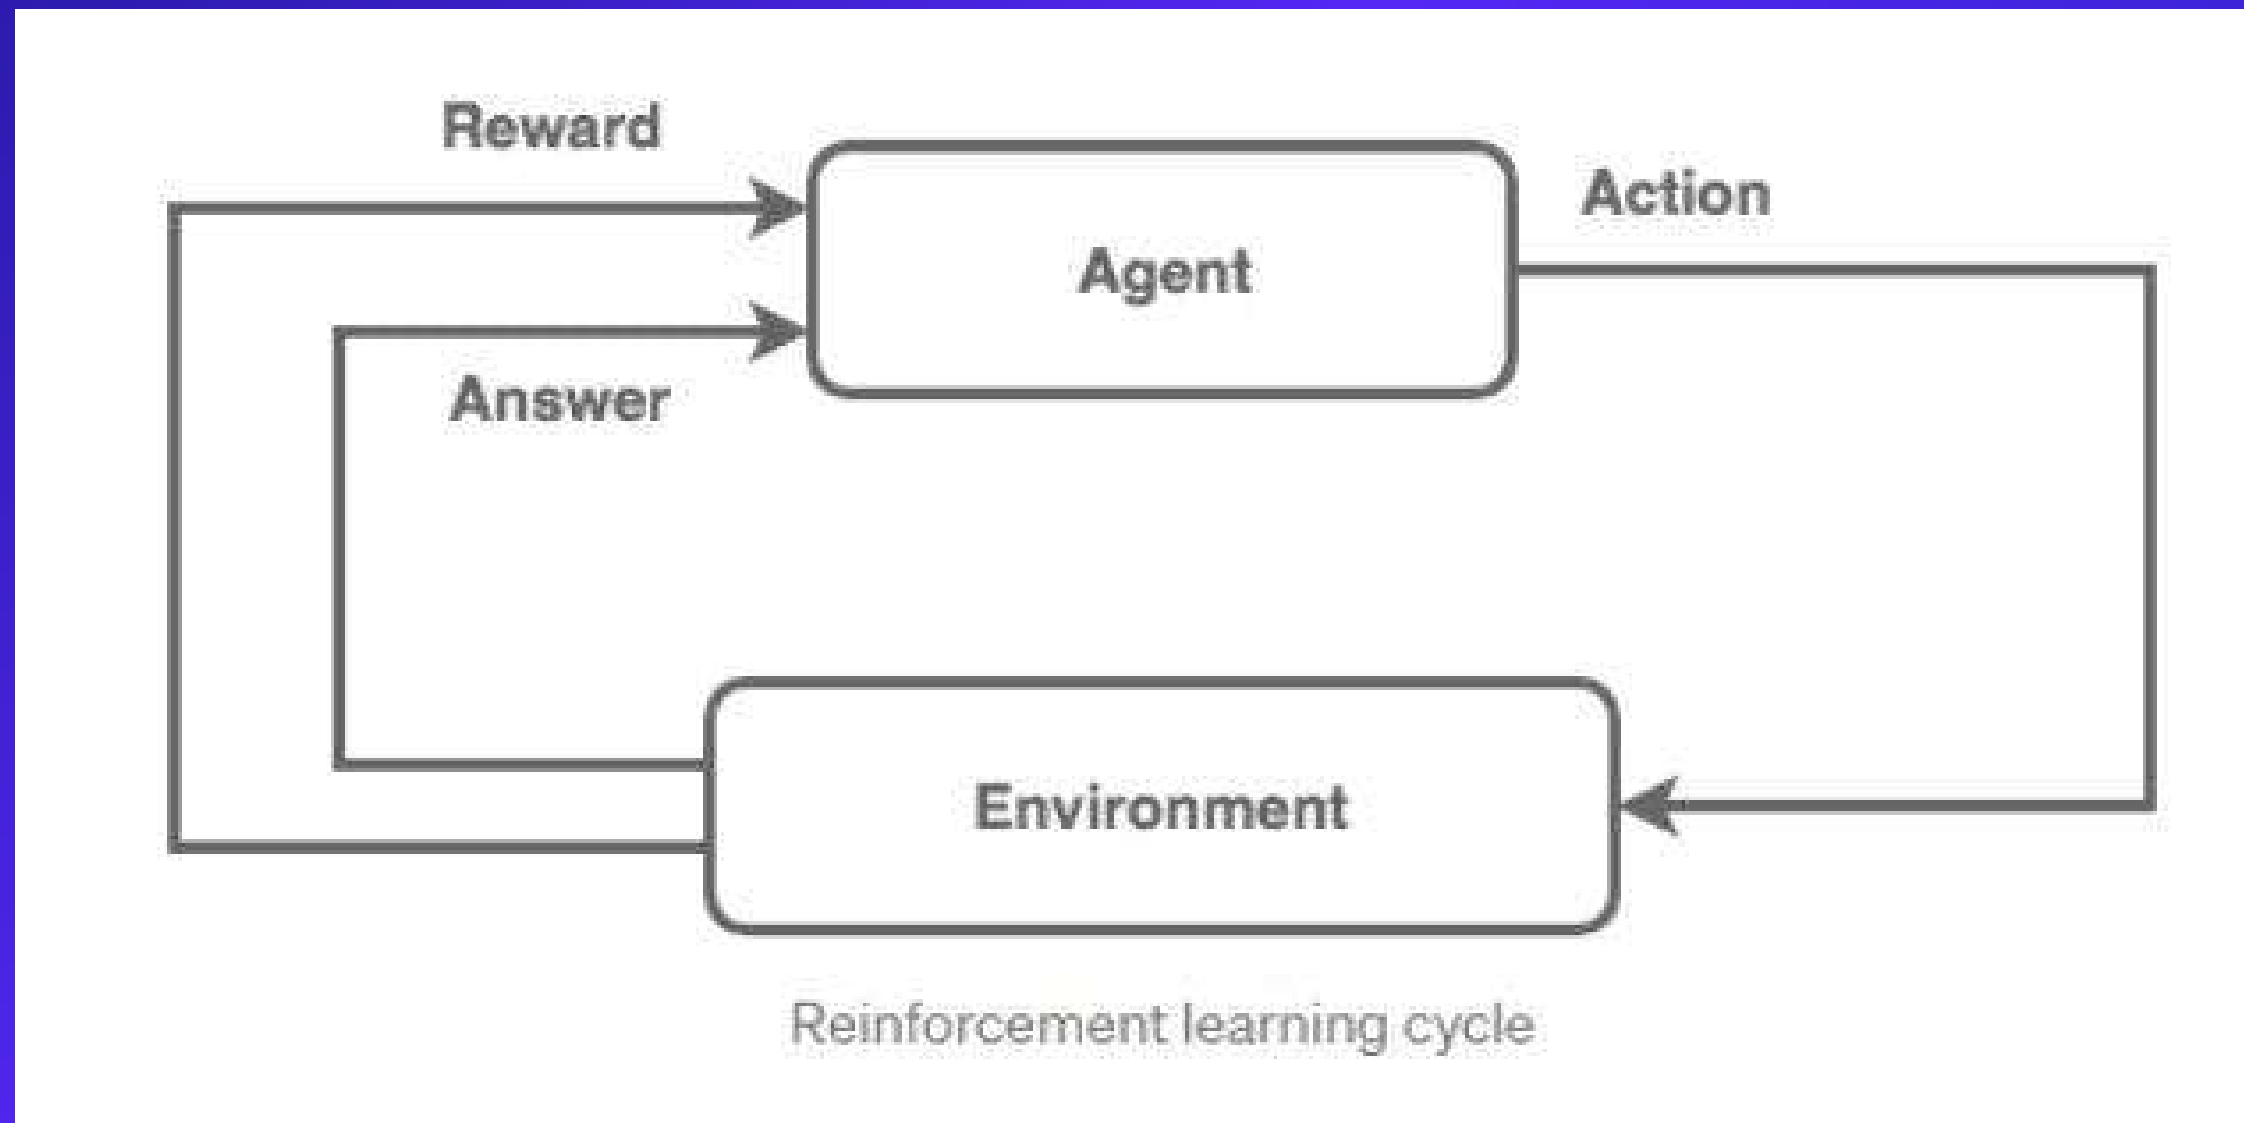

3

Model training

Reinforcement learning

It is a machine learning training method based on rewarding desired behaviors and punishing undesired ones

4

MODEL EVALUATION

Performance metrics

- **Goal completion rate**
- **Task success rate**
- **User satisfaction**
- **Average conversation length**
- **Fall back rate**

ADDITIONAL FEATURES

- **Multilingual support**
- **Speech – to – text**
- **Specific prompts for specific use case**
- **Dedicated section for providing precise recommendations for life threatening diseases like cancer, HIV, and autoimmune diseases**

CONCLUSION

**With this NLP chatbot we aim to provide better
healthcare to every ordinary citizen
by helping the doctor understand the issue
better!**

THANK YOU!
